CERTIFICATE OF PROCESS

This Certificate of Process represents a processed product from C & G Containers, Inc. Each component was prepared in accordance with C & G Containers' low-particulate processing procedures, as outlined below.

PRODUCT ITEM(S) PROCESSED: **Container:** 16 oz Amber Boston Round
Closure: 28-400 White PTFE Lined Cap

PART NUMBER: LAB016800103

DATE PROCESSED: 28 September 2026

LOT #: 092826-01

Summary of Process (D12 Low Particle):

Containers are purged with Ultra High Purity (UHP) grade nitrogen gas to remove particulate matter, lint, and other debris. The containers are then washed with ultrapure water and subjected to a controlled dry-heat treatment to reduce particulate matter.

Closures are purged with Ultra High Purity (UHP) grade nitrogen gas to remove particulate matter, lint, and other debris, followed by washing with ultrapure water. After washing, the closures are thoroughly dried to remove residual moisture.

Following cleaning and drying, the containers and closures are assembled in a controlled environment. The assembled units are then double-bagged in cleanroom grade plastic bags to maintain cleanliness during storage and transportation.

Compliance Verification of Process: Chief Executive Officer

Date: 29 September 2026
